Eitan Zemel, W. Edwards Deming Professor of Quality and Productivity: Research expertise in supply chain management, operations strategy, service operations, and incentive issues in operations management.

First, and foremost, we would like to thank all the faculty who participated in the writing of the white papers. We started this process in early November and completed the majority of the project by mid-late December. Many of the faculty put a tremendous amount of time into this endeavor without really any type of reward at all. A special thanks should go to Anthony Lynch, Thomas Philippon, Raghu Sundaram and Ingo Walter who were involved and played a primary role in a number of white papers.

We benefited and were influenced by discussions on the overall theme with a number of co-authors, academic colleagues and practitioners who do not appear in

the book, especially Franklin Allen, Yakov Amihud, Jacob Boudoukh, Sreedhar Bharath, Darrell Duffie, Douglas Gale, Anurag Gupta, Timothy Johnson, Julian Franks, Max Holmes, Jeff Mahoney, Ouarda Merrouche, Eli Ofek, Matthew Pritzker, Raghuram Rajan, Orly Sade, Hyun Shin, Richard Sylla, Glen Suarez, Suresh Sundaresan, Vikrant Vig, S. “Vish” Viswanathan and Tanju Yorulmazer.

Finally, a special thanks needs to be given to our PhD students, and especially Hanh Le for proofreading and Farhang Faramand for research assistance. And, of course, to Les Levi, Anjolein Schmeits and Myron Scholes for reading the book cover to cover and giving many valuable comments which greatly improved the work.
